Investigation by the Department of Public Utilities, pursuant to Chapter 209, Section 51 of the Acts of 2012, An Act Relative to Competitively Priced Electricity in the Commonwealth, to establish a cost-based rate design for Boston Gas Company and Colonial Gas Company d/b/a National Grid.

On August 26, 2013, in compliance with Investigation by the Department of Public Utilities Pursuant to Chapter 209, Section 51 of the Acts of 2012, an Act Relative to Competitively Priced Electricity in the Commonwealth, D.P.U. 12-126 (August 16, 2013), Boston Gas Company and Colonial Gas Company d/b/a National Grid (Boston Gas Company and Colonial Gas Company, together the "Company") filed a proposed cost-based rate design with the Department of Public Utilities ("Department"). The Department docketed this filing as D.P.U. 12-126-D.

Section 51 of An Act Relative to Competitively Priced Electricity in the Commonwealth, St. 2012, c. 209 ("Section 51") requires the Department to commence a proceeding for each gas and electric distribution company to establish a cost-based rate design for costs that are currently recovered from distribution customers through a reconciling factor. Section 51 provides that the Department shall approve the redesigned reconciliation factors, after a public hearing comment period, not later than January 1, 2014. The Company proposes to implement the changes during 2014 on the date that the factor would otherwise be updated pursuant to its tariffs.

If Boston Gas Company's rate design is approved as proposed, the Company calculates that it will have the following effects on total annual bills for a typical customer in the following rate classes:

- total annual bills will increase for the following residential customer classes:
R-1 – residential non-heating (1.1%); R-2 – residential assistance non-heating (1.0%); R-3 – residential heating (1.6%); R-4 – residential assistance heating (1.4%).

- total annual bills will increase for small commercial and industrial ("C&I") classes (0.9% to 2.4%), and will decrease for the following groups of classes: medium C&I (-0.3% to -1.7%); large C&I (-1.8% to -3.2%); and extra-large C&I (-3.9% to -5.0%).

If Colonial Gas Company's rate design is approved as proposed, the Company calculates that it will have the following effects on total annual bills for a typical customer in the following rate classes:

- total annual bills will increase for the following residential customer classes: R-1 – residential non-heating (1.0%); R-2 – residential assistance non-heating (1.0%); R-3 – residential heating (1.4%); R-4 – residential assistance heating (1.4%).
- total annual bills will decrease for all groups of C&I classes: small C&I (-0.3% to -0.5%); medium C&I (-3.1% to -3.3%); large C&I (-5.6% to -5.7%).
